

Magnetic Hand Tools

Series: HT

STANDARD FEATURES:

- Permanent Ceramic 8 magnet material
- 11 ga. steel upper casing
- Plastic lip and lower casing

Application: MPI's MAGNETIC HAND TOOLS (HT Series) provide a quick, easy way to handle small ferrous metal parts. Common uses include: machine area maintenance, stock bin loading/unloading, sorting, weighing and packaging.

Operation: Permanent Ceramic 8 magnet material is mounted inside an 11 gauge steel upper casing. The finger tip control release knob quickly drops the entire load, and a plastic lip prevents parts from traveling up the side of the case. An optional all stainless steel casing with neoprene moulding is available for heavy-duty applications.

Providing Magnetic Solutions For the Material Handling Industry

SELECTION:

Using the chart below, first determine the approximate weight of the load you expect to handle. Select the proper size either the standard height model or extended handle model, based on the capacity required for your application.

As a leader in the development of Magnetic Material Handling Equipment, **MPI** is committed to the continuous design and performance improvements of their products. This commitment to excellence is made to you with free engineering services and assistance in selecting the proper equipment for your application. For more information please contact your local sales representative, contact our customer department at our factory or visit our website, the numbers, emails and web addresses are listed below.

HT-SERIES SELECTION CHART STANDARD MODELS

Model Number	Width		Length		Height		Approx. Unit Weight		Laod Capacity	
	IN.	MM	IN	MM	IN.	MM	LBS.	KG	LBS.	KG
