

Fork Lift Sweep

Series: FLS

Application: MPI's powerful FORK LIFT SWEEPER (FLS Series) is designed to be attached to your forklift or tow hooks on a truck then transported around the work area to pick up any loose ferrous materials. This saves a lot of time for large open areas over our basic floor sweepers and magnetic brooms. There is also a quick clean stripper assembly option which makes the FLS very quick and easy to clean. Our FLS series sweepers will

keep your work area a safer place for your employees and vehicles.

Operation: MPI's FLS series sweepers can connect to your forklift or truck by a chain which connects to the eyelets. The FLS can also be built with an optional T-handle locking system for easy, quick and safe clamping on standard fork lift trucks.
