

# MAGNETIC TUBE PROBE

Buy at Amazon 

Image not found or type unknown

MPI Magnetic Tube Probes are used to test bulk product containers for ferrous contamination prior to processing and to remove ferrous materials from product in hard-to-reach areas

## How It Works

Insert probe into product in several locations. Remove slowly to check for ferrous particles on probe. Clean by wiping probe with a clean rag.

## MPI Difference

- 304 Stainless steel construction
- 1" diameter stainless steel tubing with 6" of magnet area at end of probe
- T-bar handle with rubber grips
- Available in 2', 3', 4', and 5' lengths
- Permanent ceramic 8 magnet material

## Specifications

<b>Model #</b>	<b>Magnet Material</b>	<b>Overall Length</b>
<b>MTP-124</b>	Ceramic	24"
<b>MTP-124-REN</b>	Rare Earth	24"
<b>MTP-136</b>	Ceramic	36"
<b>MTP-136-REN</b>	Rare Earth	36"
<b>MTP-148</b>	Ceramic	48"
<b>MTP-148-REN</b>	Rare Earth	48"
<b>MTP-160</b>	Ceramic	60"
<b>MTP-160-REN</b>	Rare Earth	60"

## Options

- Powerful Rare Earth magnet material
- Custom lengths
